Gantrisin Ophthalmic 'Roche'

GANTRISIN DIETHANOLAMINE

more effective

In a series of 180 cases, new Gantrisin Ophthalmic Solution proved more effective "in acute and subacute conjunctivitis produced by either gram negative or gram positive organisms."[†]

Because Gantrisin* Ophthalmic has a wider antibacterial spectrum, it is highly effective against many microorganisms found in conjunctivitis, blepharitis, dacryocystitis, corneal ulcer, trachoma, superficial punctate keratitis and other eye infections.

Because Gantrisin Ophthalmic is an isotonic solution, it usually does not irritate or sting the eyes.

The fact that it is a single sulfonamide, not a mixture, reduces risk of sensitization.

A sterile, stable solution containing 4% Gantrisin Diethanolamine in 1-oz vials with dropper, it does not require refrigeration.

safer

Gantrisin Ophthalmic is "better tolerated, and less prone to the production of sensitization or allergic reactions than any of the other sulfonamides or antibiotic preparations."[†]

ANTIBIOTIC DIVISION

CHAS. PFIZER & CO., INC., Brooklyn 6, N. Y.

Prelude to asthma?

not necessarily...

Tedral, taken at first sign of attack, often forestalls severe symptoms.

in 15 minutes... Tedral brings symptomatic relief with a definite increase in vital capacity. Breathing becomes easier as Tedral relaxes smooth muscle, reduces tissue edema, provides mild sedation.

for 4 full hours... Tedral maintains more normal respiration for a sustained period—not just a momentary pause in the attack.

Prompt and prolonged relief with Tedral can be initiated any time, day or night, whenever needed without fear of incapacitating side effects.

Tedral provides:

theophylline	2 gr.
ephedrine	$\frac{3}{8}$ gr.
phenobarbital	$\frac{1}{8}$ gr.

in boxes of 24, 120 and 1000 tablets

Tedral

CHILCOTT

ALL FORMS OF EPILEPSY MAY BE TREATED WITH THIANTOIN SODIUM

(PHETHENYLATE SODIUM, LILLY)

This flexibility is a distinct advantage for, unlike some anticonvulsants, **THIANTOIN SODIUM** does not depress one type of seizure, only to bring other kinds into prominence. **THIANTOIN SODIUM** is a widely useful antiepileptic and is safer than other hydantoin compounds of comparable potency. Many resistant cases are controlled with doses which have been elevated safely to levels that were previously unattainable. Not only are there fewer side-effects, but there is often striking improvement of mental function in epileptic patients who receive **THIANTOIN SODIUM**.

ELI LILLY AND COMPANY *Indianapolis 6, Indiana, U. S. A.*

The American Chemical Society, like Eli Lilly and Company, is now celebrating its seventy-fifth anniversary, and we pause to pay it tribute. Our own industry, as well as all of American progress and humanity, is deeply indebted to this esteemed group of scientists.

Detail of the Labyrinthine Structure

"The prophylactic value of Dramamine was conclusively demonstrated among 170 passengers who volunteered the information that they were unusually susceptible to motion sickness. . . . There was complete relief (freedom from any signs or symptoms of airsickness) in 152 cases or 89.5 per cent; . . ."

—Tuttle, A. D.: *Special Breakdown of Case Histories*, presented at the Airlines Medical Directors Association Meeting, New York, N. Y., Aug. 28, 1949.

DRAMAMINE[®] Brand of Dimenhydrinate

For the prevention or treatment of motion sickness caused by automobiles, streetcars, ships, planes, trains and other vehicles.

Supplied in 50 mg. tablets and in liquid form.

MULCIN

puts a smile
in the
vitamin spoon...

**Mead's new vitamin emulsion
of unexcelled flavor
and physical qualities**

Mulcin's refreshing orange flavor, sunny yellow color and pleasant aroma will bring smiles to the faces of your young patients at vitamin time.

Children and adolescents enjoy taking Mulcin directly from the spoon. For infants, Mulcin mixes easily with formula, fruit juice or cereal.

Clear, light texture of remarkable smoothness and non-sticky, easy-pouring consistency enhance the physical excellence of this vitamin emulsion.

A product of pharmaceutical elegance, Mulcin is a distinguished member of Mead's vitamin family.

EACH TEASPOON OF MULCIN SUPPLIES:

Vitamin A	3000 units
Vitamin D	1000 units
Thiamine	1.0 mg.
Riboflavin	1.2 mg.
Niacinamide	8.0 mg.
Ascorbic Acid	50 mg.

Available in 4 oz. and 16 oz. bottles

New improved ANACAP[®] SURGICAL SILK

5 *ways better than ever before*

1. *Greater tensile strength:* One of the strongest silks ever created—smaller diameter sizes can be used everywhere to minimize trauma and foreign body reaction.

2. *Withstands repeated sterilization:* New Anacap Silk can be boiled or autoclaved *six separate times* without appreciable change in either strength or texture. In laboratory tests almost the full original strength is maintained even after 23½ hours of boiling.

3. *Easier to handle:* Firmer, not limp, Anacap Silk speeds operative technic. Braided by a new method that minimizes "splintering" and "whiskering" it passes readily through tissues. The ease of handling Anacap makes it a "new experience" in silk suturing.

4. *Absolute non-capillarity:* Having no wick-like action, new Anacap Silk is resistant to body fluids and will not spread an early localized infection if it occurs.

5. *Doubly economical:* Low in original purchase price, new Anacap Silk is also low in individual suture cost because of its long sterilization life.

In sizes 6-0 to 5 on spools of 25 and 100 yards; sterile in tubes with and without D & G Atraumatic[®] needles attached.

DAVIS & GECK, INC.

57 Willoughby Street,  Brooklyn 1, N. Y.

8 substances

Structural and functional integrity of the normal erythrocyte depends on a wide range of substances—8 of which are encompassed in each Cebetinic* tablet:

Ferrous Gluconate	5.0 grains
Vitamin B ₁₂ Factors	1.0 microgram
<i>(as determined by microbiological assay)</i>	
Folic Acid	0.67 milligram
Thiamine Hydrochloride	2.0 milligrams
Riboflavin	2.0 milligrams
Pyridoxine Hydrochloride	0.5 milligram
Nicotinamide	10.0 milligrams
Ascorbic Acid	25.0 milligrams

For anorexia, asthenia and anemia related to: nutritional deficits; post-infection and post-surgical states; chronic blood loss; gastrointestinal disorders of absorption; periods of rapid growth in children; puberty and pregnancy—

R_x Cebetinic

Dosage: AVERAGE ADULT — 3 tablets daily

CHILDREN—from 1 to 3 tablets daily, according to age

In bottles of 60 and 500 tablets

Upjohn

Medicine...Produced with care...Designed for health

Antistine-Privine contains Antistine, to block the congestive action of histamine, and Privine, to shrink the nasal mucosa. Friedlaender and Friedlaender found that the decongestant action of Antistine-Privine on the allergic nasal mucosa "in many instances appears to be more intense and prolonged than from either solution alone!"

Systemic side reactions or rebound congestion are unlikely with Antistine-Privine because of the low concentrations of the active ingredients.

Antistine-Privine, aqueous solution of Antistine® (antazoline) hydrochloride, 0.5% and Privine® (naphazoline) hydrochloride, 0.025%, in bottles of 1 fl. oz. with dropper.

***“bloating, belching
and indigestion”***

You can provide extraordinary relief of the bloating, belching and other complaints of many of your patients with so-called functional indigestion by prescribing Bilogen — a therapeutically designed choleretic-digestant. In each Bilogen tablet you'll find: Ox bile extract (2 grs.) to stimulate bile secretion, oxidized mixed ox bile acids (1¼ grs.) to flush biliary ducts, desoxycholic acid (½ gr.) to promote fat absorption, and a pancreatin of high digestive power (equivalent to 3¾ grs. Pancreatin, U. S. P.) to exert enzymatic action. Note too that this pancreatin is given double protection with a special coating to insure its release in the intestine. The coordinated action of the four Bilogen ingredients provides natural biliary stimulation, relieves upper abdominal distress, and re-establishes normal functions. Bilogen is available in bottles of 100 and 1000 tablets.

Down to one handkerchief a day

'Perazil' approaches the ideal antihistaminic in long-lasting effect and freedom from side effects. A single daily dose of 50 to 100 mg. is usually adequate, acting for 12 to 24 hours. Side effects are infrequent and if they do occur, are usually mild.

Clinicians report: "... the results ... would appear to demonstrate 'Perazil' the most effective of all the antihistaminic agents so far studied by the physicians who used it."

Chemically different, 'Perazil' does not have the usual ethylenediamine group but has a piperazine nucleus. Therapeutically different, 'Perazil' need not be taken, as a rule, more than once a day.

'Perazil'[®] is indicated in all allergic states responding to antihistaminics.

EFFECTIVE

**in Coronary Artery Disease and
Edema of Cardiovascular or Renal Origin***

DEFINITELY PROVEN Clinical experience and carefully controlled objective studies in humans have definitely proven the value of Theobromine Sodium Acetate in treating Angina Pectoris and Edema of Cardiovascular or Renal origin.

Recommended Dosages THESODATE dosage advised in:

ANGINA PECTORIS— $7\frac{1}{2}$ grains q.i.d., before meals and before retiring. A capsule upon arising if necessary.

HYPERTENSION—Similar.

Control or prevention of EDEMA OF CARDIOVASCULAR OR RENAL ORIGIN—Similar.

SEVERE EDEMA—15 grains q.i.d., before meals and before retiring.

S u p p l i e d THESODATE supplied in bottles of 100;500:

$7\frac{1}{2}$ grain enteric-coated tablets with or without $\frac{1}{2}$ gr. phenobarbital.

$3\frac{3}{4}$ grain enteric-coated tablets with or without $\frac{1}{4}$ grain phenobarbital.

5 grain enteric-coated tablets with 2 grains potassium iodide and $\frac{1}{4}$ grain phenobarbital.

Capsules (not enteric-coated) available in same potencies for supplementary medication.

THE FIRST 84 YEARS
ARE THE *easiest...*

In 1867, Mallinckrodt opened its doors for business, the first manufacturer of fine chemicals between Philadelphia and the West Coast. The changes that have taken place since then in the scientific world have demanded more and greater skill, controls and equipment in the manufacture of fine chemicals. Our chemists and engineers have continuously met these new demands and in many cases have led the field.

But the changes of these past 84 years are likely to be dwarfed in this era of atomic energy. Our most challenging tasks still lie ahead. We are making the necessary preparations to be ready for them.

MALLINCKRODT CHEMICAL WORKS • St. Louis • New York • Montreal

• MANUFACTURERS OF FINE CHEMICALS AND DRUGS FOR THE MEDICAL PROFESSION • SINCE 1867 •

the oral route
is the simplest

For maintaining the edema-free state, here—at last—is truly effective oral mercurial diuretic therapy. One or two Tablets MERCUHYDRIN® with Ascorbic Acid daily (more when indicated) generally controls cardiac edema with

greater convenience • greater economy • greater safety

Tablets
MERCUHYDRIN
WITH ASCORBIC ACID

After parenteral therapy, your patient has been brought to unfluctuating basic weight. Then systematic oral therapy employing Tablets MERCUHYDRIN (brand of meralluride) with Ascorbic Acid may eliminate the need for injections entirely in mild decompensation. In more advanced cases, you can greatly reduce the number of injections required to maintain your patients free of edema.

Prolongation of the interval between injections simplifies management. The diuretic response is good, the tablets are well tolerated, the method is convenient, and the economy considerable.

Packaging: Tablets MERCUHYDRIN with Ascorbic Acid, available in bottles of 100 tablets. Each tablet contains meralluride 60 mg. (equivalent to 19.5 mg. mercury) and ascorbic acid 100 mg.

Terramycin

dosage forms for optimal simplicity and flexibility

For oral administration, Terramycin is supplied in Capsules of 3 potencies, as well as in a palatable Elixir and concentrated Oral Drops made possible by the unique solubility of this great antibiotic agent. Terramycin is the only broad-spectrum antibiotic available in these 3 forms which simplify oral therapy for patients at all age and weight levels.

For the treatment of severe fulminating infections, Terramycin Intravenous permits the attainment of immediate high serum concentrations. And for topical therapy of ocular infections, Terramycin is available as an Ophthalmic Ointment and an Ophthalmic Solution, both well tolerated and effective against a wide range of micro-organisms causing infection of the eye.

supplied: **Capsules:** 250 mg., bottles of 16 and 100; 100 mg., bottles of 25 and 100; 50 mg., bottles of 25 and 100; **Elixir:** 1.5 Gm. in 1 oz. diluent; **Oral Drops:** 2.0 Gm. in 10 cc. diluent with calibrated dropper; **Intravenous:** 10 cc. vial, 250 mg.; 20 cc. vial, 500 mg.; **Ophthalmic Ointment:** 5 mg. per Gm., $\frac{1}{8}$ oz. tube; **Ophthalmic Solution:** 25 mg., 5 cc. dropper-vial.
